Dr. A. T. Wilson  
Department of Scientific  
and Industrial Research  
Division of Nuclear Science  
Private Bag, Lower Hut  
New Zealand

Dear Dr. Wilson:

Further to our correspondence of last March. I wonder whether you had seen the following paper which may be relevant to the accumulation of bacteria in oceanic foams.

Boyles, W. A., and R. E. Lincoln, 1958.  
Separation and concentration of bacterial  
spores and vegetative cells by foam  
flotation. Appl. Microbiol. 6:327-334.

Yours sincerely,

Joshua Lederberg  
Professor of Genetics
